

ORDEM 2025

Mapping the Humanitarian Crisis of
Forced Disappearances in Jalisco
Patterns, Technology, and Collective Action

Full text

Angel R. Abundis

13,754

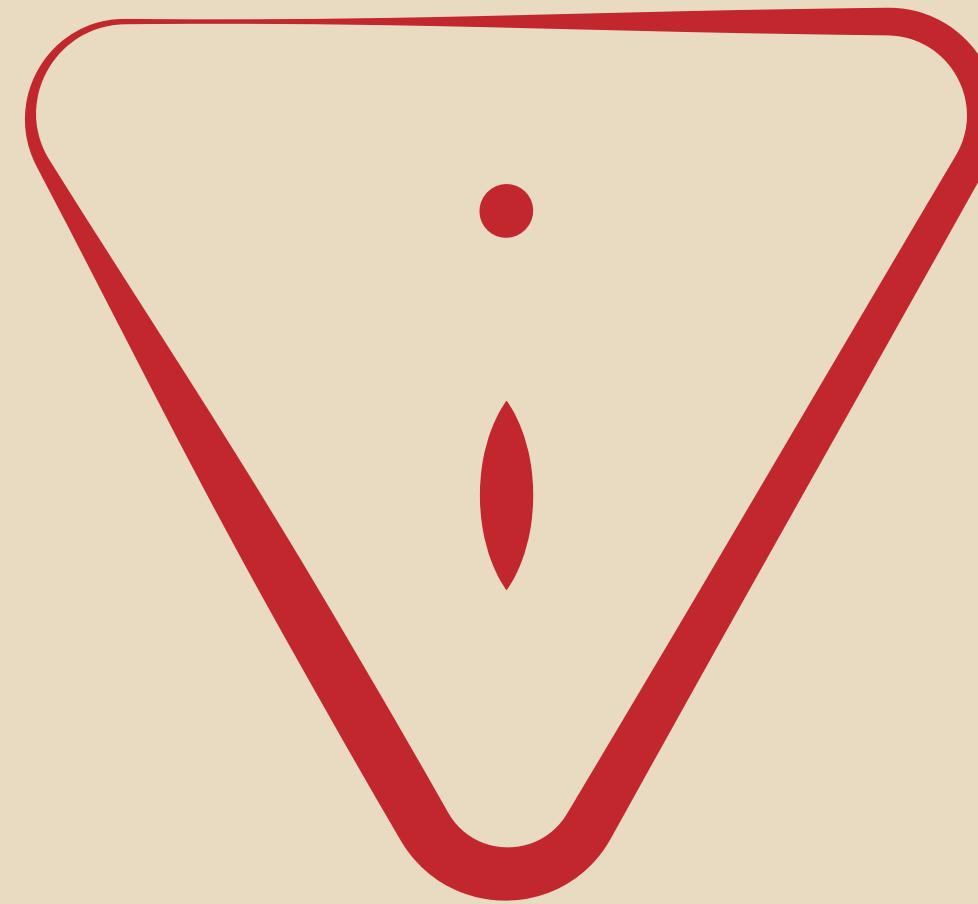

disappearances (only in the Guadalajara Metropolitan Area): In Jalisco, 15,348 missing persons have been officially reported between 2018 and 2024 (SISOVID, 2024)

Cifra negra

(Dark figure of crime)

Official data rigging

The green in the grassroots

Families of the disappeared have formed search collectives to demand justice and conduct investigations in Jalisco.

FUNDEJ (2013)

Helped create the Jalisco State Law on Missing Persons.

Por Amor a Ellxs

Advocated for forensic identification and investigation cards.

Corazones Unidos en Busca de Nuestros Tesoros

Specializes in locating clandestine graves in Zapopan, El Salto, and Tlajomulco.

Luz de Esperanza

Secured agreements for search notices on municipal screens.

Madres Buscadoras (since 2022)

Expanded field searches into multiple municipalities.

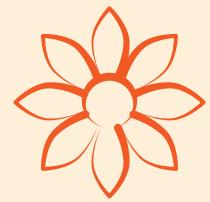

Family Collectives: From Resistance to Reform

International Recognition & UN Support:

In 2016, Por Amor a Ellxs & CEPAD, backed by Jan Jarab (UN-OHCHR Mexico), exposed state secrecy in missing persons' case files.

Led to increased pressure on authorities for transparency and accountability.

Creation of New Institutions & Laws:

Specialized Prosecutor's Office for Missing Persons (2017).

Department of Analysis and Context to improve disappearance diagnoses.

Creation of Official
Data Systems

SIABA
SISOVID

Official data rigging

2023 Report: "SISOVID IS

A BIG DECEPTION"

by the University Committee for the Analysis of Disappearances (Dr. Chinas)
revealed systemic data manipulation.

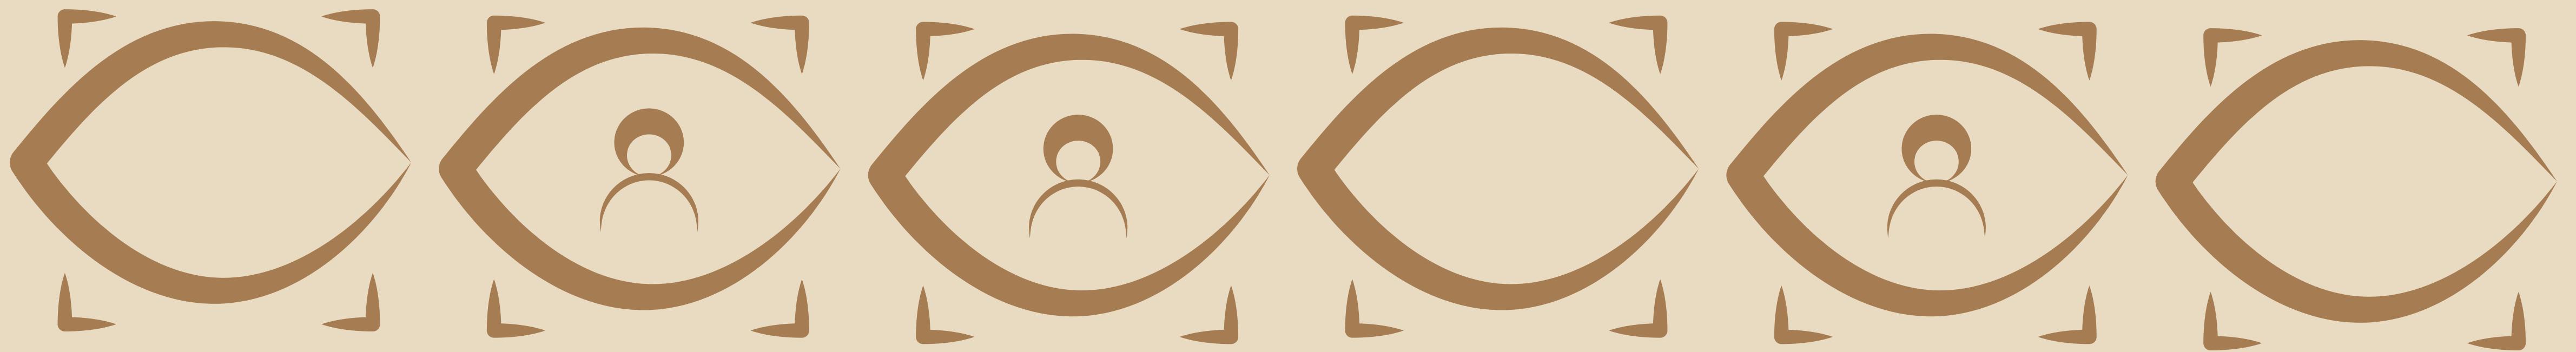

1,300 records were removed

from SISOVID in 2022 (discovered by Dr. González).

Data Power: Searching for the Missing Ones

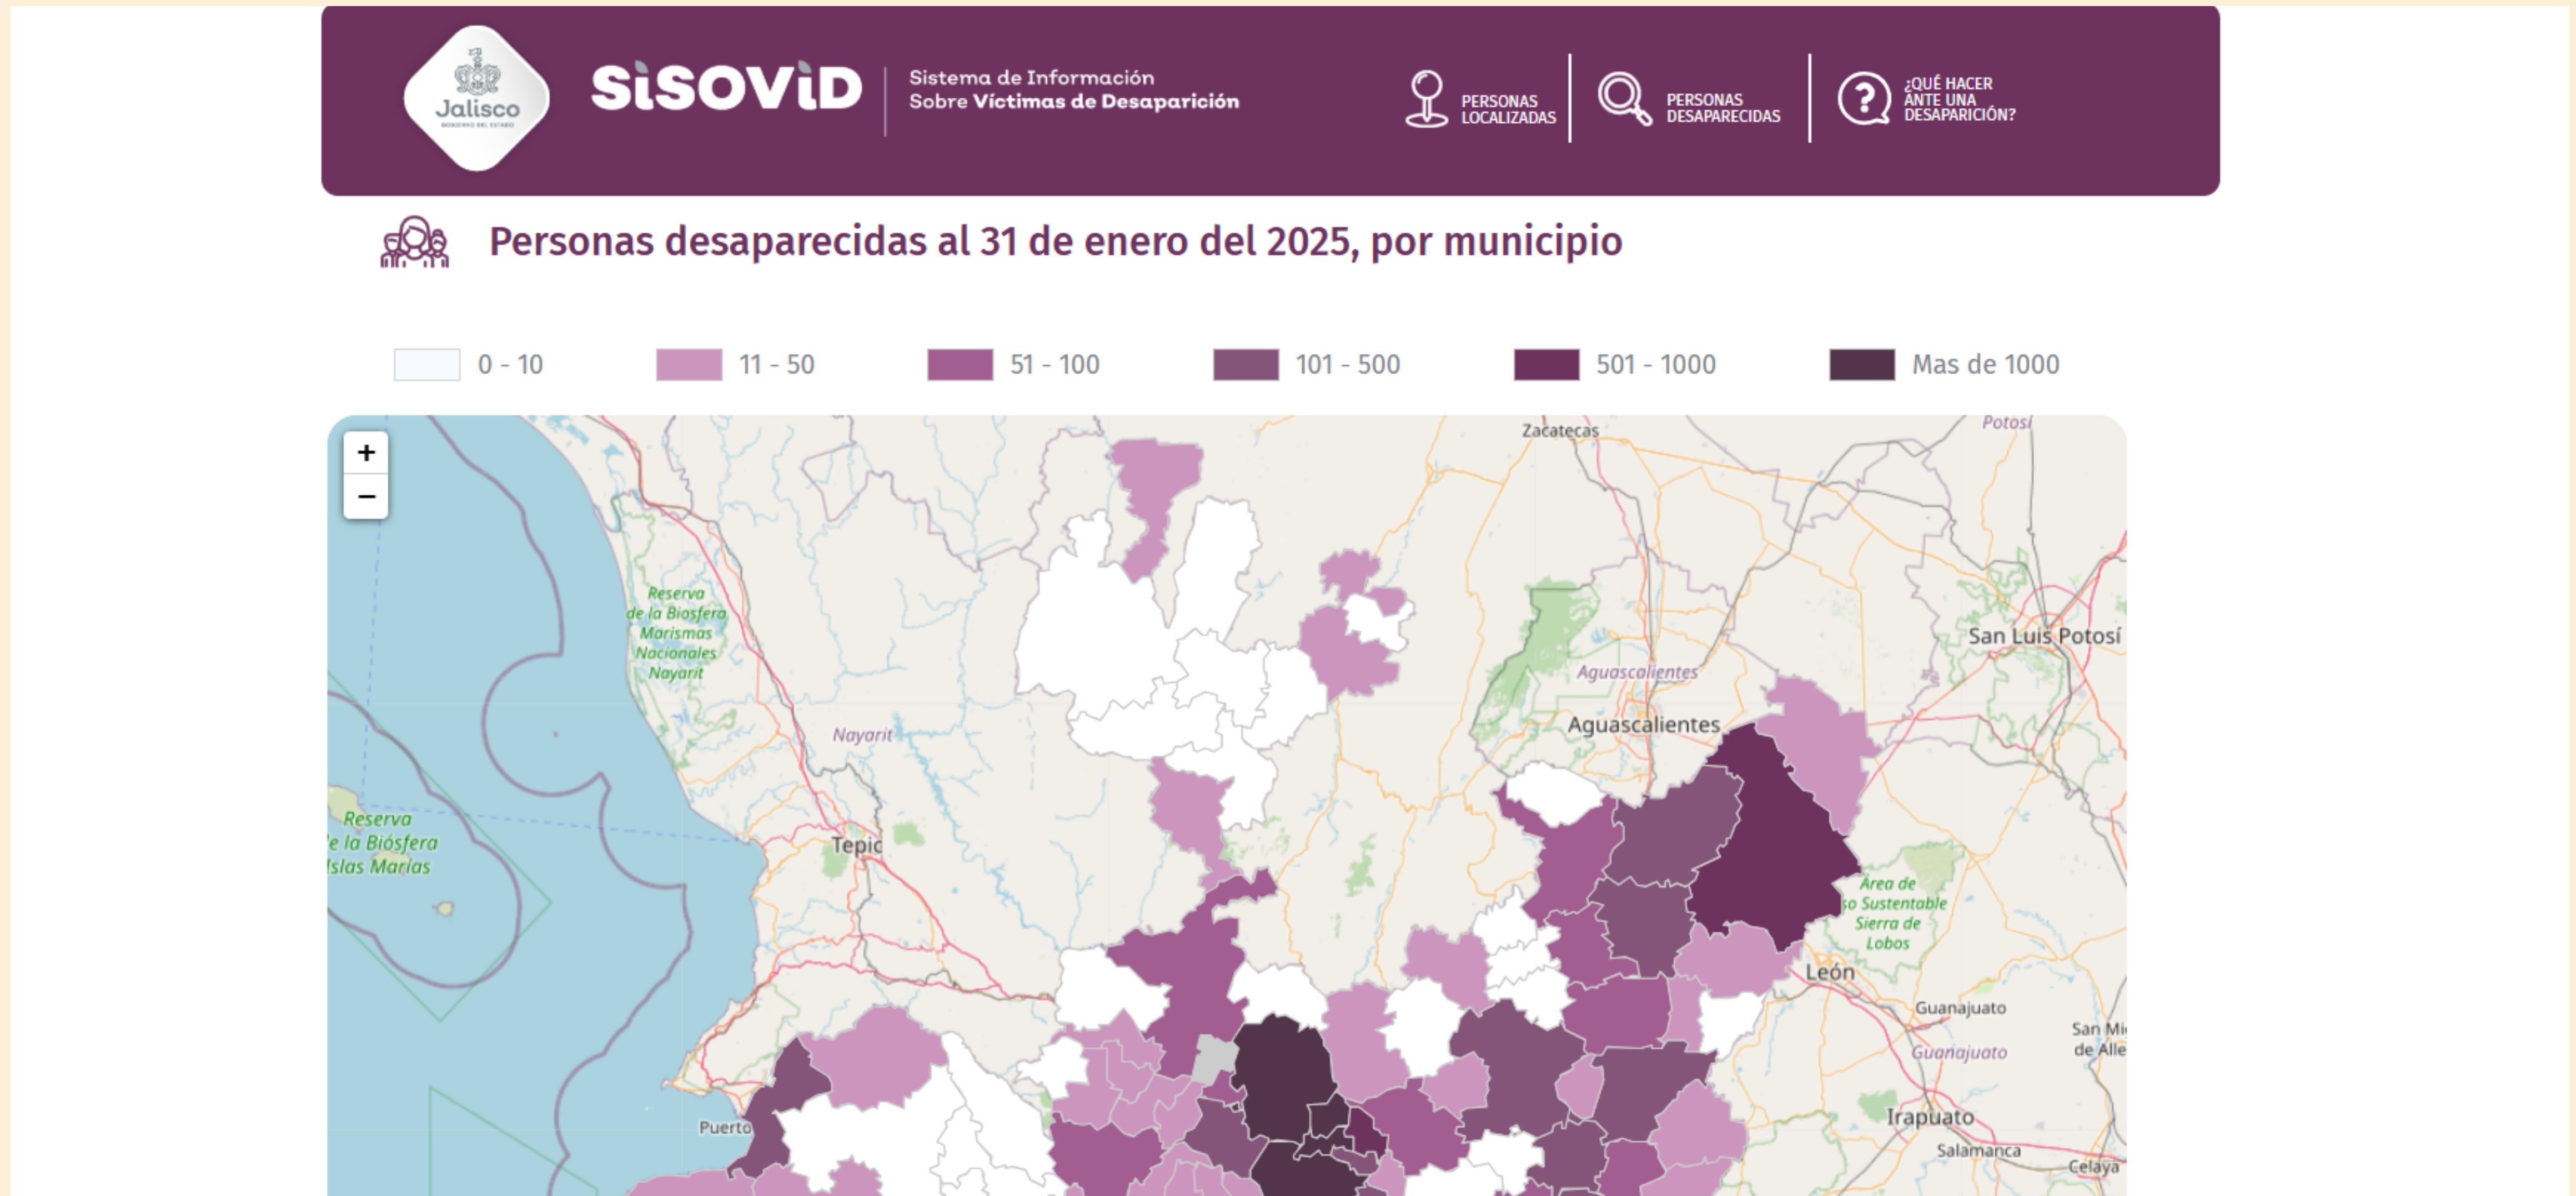

Mapping the Humanitarian Crisis of Forced Disappearances in Jalisco

{Mine, Lookup, Backup & Visualize}

SISOVID: Rigged and useless (large scale stats)

REPD: Searching notices (API exposed)

Registro Estatal de Personas Desaparecidas

REPD: Searching notices (Backup process)

The API response contains key information for this pilot:

**description of
the
disappearance**

State government's policy promotes opacity on the site's front end

Sensitive information is accessible via the API

REPD: Searching notices (Backup process)

Python script queried **API metadata**

Stored **7,837 records** in a relational database

Deduplication logic based on '`id_cedula_busqueda`'

Maintains **data granularity**

Physical descriptions, **distinguishing features**, clothing

Look for relevant data

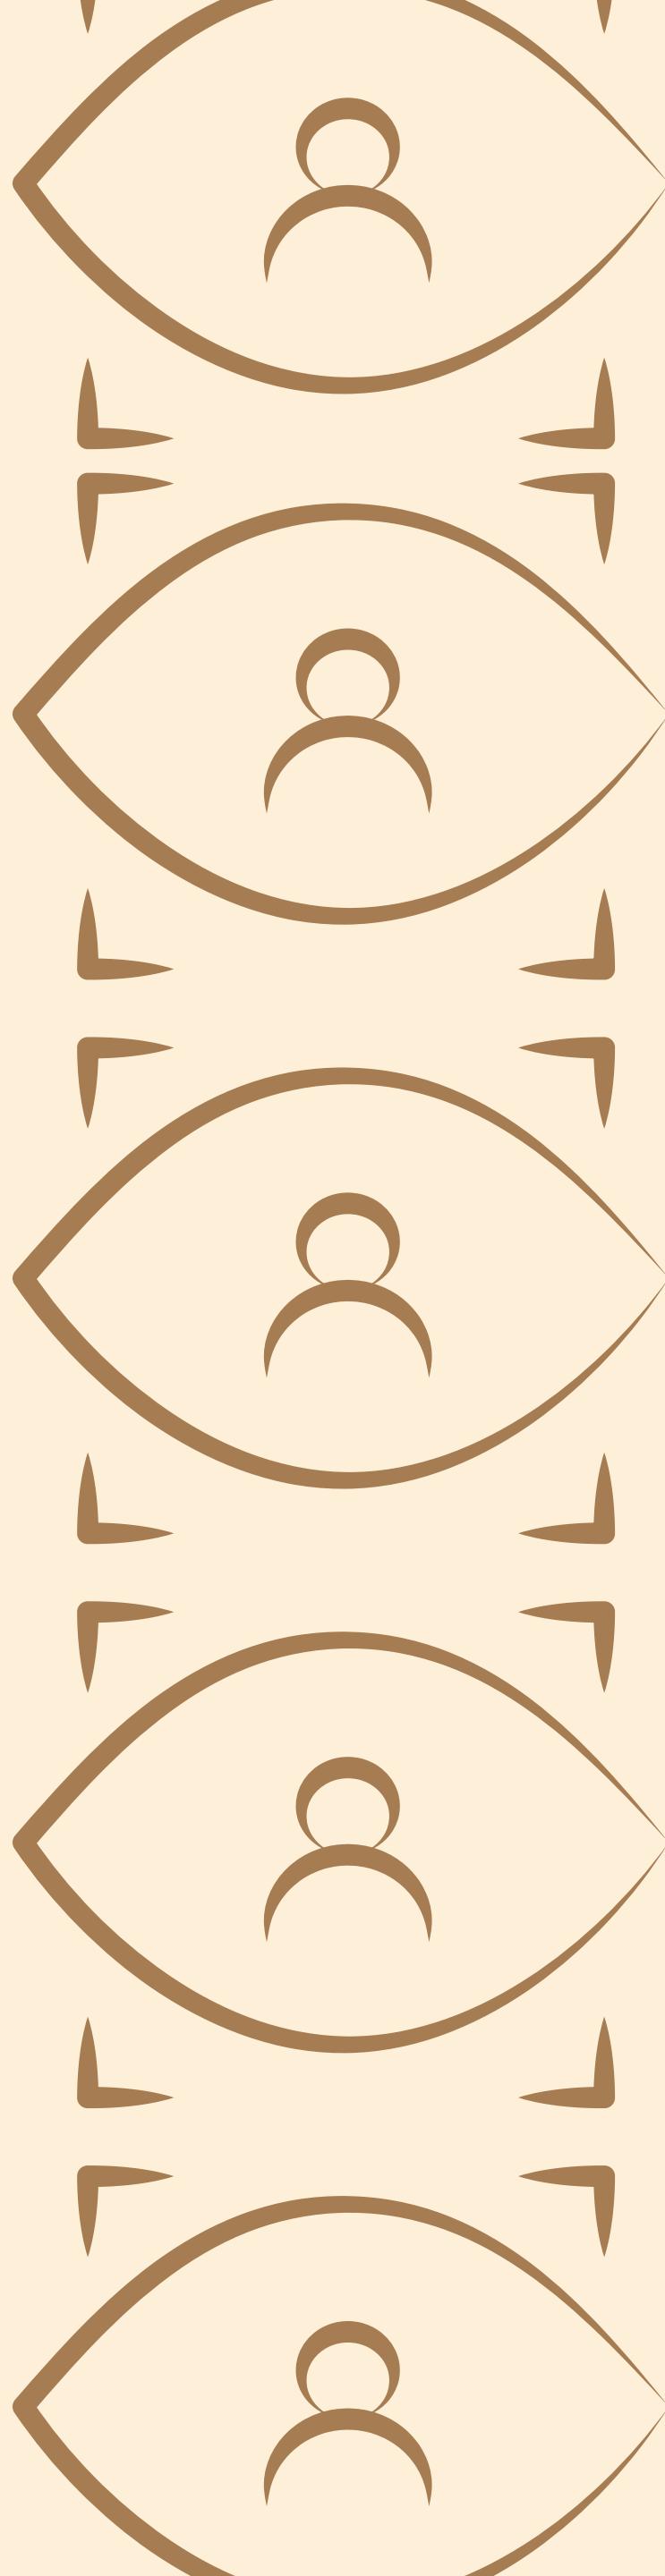

Pattern Structure:

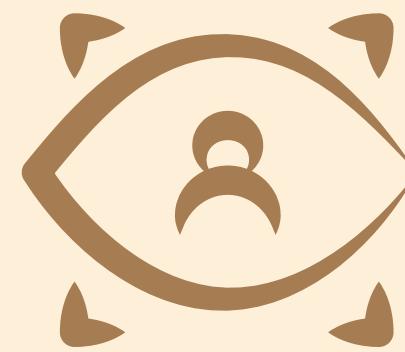

```
"LOWER": "calle" → Matches the word calle (lowercase)  
"IS_ALPHA": True, "OP": "+" → Matches one or more alphabetic words  
"IS_PUNCT": True → Matches punctuation (e.g., a comma or period)  
"IS_DIGIT": True → Matches numerical values (e.g., house number)
```

Address & Possible Motivations

```
Detecting Motivation or Violence-Related Terms  
TERMS = ["armados", "droga", "mota", "dinero"]
```

```
PATTERNS = [ {"LOWER": term} for term in TERMS]
```
